

Best Practices for electronic Permit to Work

Permits at your fingertip

Are you using a combination of paper-based, home-grown applications and spreadsheets to tackle your permits?

Do you find yourself reworking your permits on a daily basis?

Would you like to find a way of expediting your turn-around project?

If you answered yes to any of the above, this webinar may just be for you.

Webinar Objectives

Electronic Permit to Work (PTW) has been used a lot by upstream oil & gas and utility companies in Europe. Recently, U.S. based integrated oil & gas and utility companies have begun implementing electronic PTW solutions. This webinar will focus on the operations efficiencies that can be gained in going to an electronic PTW solution along with the compliance benefits. We will also look at the value of integrating to work order, job safety analysis and management of change solutions.

Key Features

- PTW Best Practices
- How to define minimum requirements for an PTW solution
- Systems integration benefits for PTW
- Some leading indicators for PTW
- A brief demonstration of a leading PTW solution
- Using Geographical Information Systems to get real time feedback on PTW
