

PSM Automation Qualifications

PSRG leverages our deep domain expertise in process safety management (PSM) to offer clients innovative PSM automation solutions. We work with customers to enhance their business processes while helping to consolidate their disparate PSM applications. We help numerous customers to evaluate viable software solutions that fit their culture, while leveraging their existing information technology portfolio.

PSM Automation Solutions Include:

- Objective Analysis of “Best of Breed” Solutions
- Management of Change & Corrective Actions
- Incident Investigation/Loss Prevention
- Process Hazard Analyses
- Compliance Auditing
- Permit to Work
- Safe Operating Envelopes/Limits
- Smart Procedures
- Field Mobility Solutions/Operator Rounds
- Real-Time Analytics & Data Aggregation
- PSM Cockpits & Operational Excellence Dashboards
- Management System & “To Be” Process Workflow Alignment with Technology
