

Best Practices for electronic Management of Change

Process Safety Management Continuous Improvement Roadmap

Are you using a combination of paper-based, home-grown applications and spreadsheets to tackle Management of Change?

Are you finding that your days to closure and past due items are difficult to stay on top of?

Do you ever find yourself ordering the wrong parts based on a lack of integration with your maintenance management system?

Is it taking too long to get an MOC routed/approved?

If you answered yes to any of the above, this webinar may just be for you.

Webinar Objectives

Management of Change is perhaps the most costly and complex process to implement in a manufacturing plant. This webinar will focus on the operations efficiencies that can be gained in going to an electronic MOC solution. We will also look at the value of integrating to work order, field mobility and other plant information systems.

Key Features

- Management of Change Best Practices
- How to define minimum requirements for an eMOC solution
- Systems integration benefits for MOC
- Some leading indicators for Management of Change
- A brief demonstration of a leading eMOC solution
